

Responsibly Sourced Natural Gas

State of the market

Roy D. Hartstein
Founder and Managing Director
Responsible Energy Solutions

“We deliver energy that
lights the world.”

Two things are true:

- 1) Natural gas is vital to the world economy today.

Two things are true:

2) The age of fossil fuels is over.

Three Important Concerns

METHANE EMISSIONS

WATER

COMMUNITY

Why Responsibly Sourced Natural Gas?

Demonstrate natural gas can be part of a long term, lower carbon energy future.

Consumers:

- ▶ Independent verification of environmental protection and community engagement by supplier.

Investors:

- ▶ Assurance that operators are responsive to environmental and community concerns and are proactively managing ESG risks and impacts.

Operators:

- ▶ Validation of risk management implementation.
- ▶ Recognition of responsible practices.
- ▶ Influence market development.

Regulators:

- ▶ Greater environmental protection. Independent validation of operator practices. Reduced community concerns.

Equitable Origin

We partner with business, communities and government to support transparent, sustainable and equitable energy development that benefits all stakeholders.
